

## Notice to Horse Lake Residents

The Cariboo Regional District has investigated some temporary water discoloration in the Horse Lake Water Service area recently. This was caused by a brief and localized disturbance within the water system, and things have now returned to normal.

The water remains safe to use, discoloration can sometimes happen when the normal water flow is stirred up, causing naturally occurring minerals to mix into the water.

If you experience any further issues, please contact the CRD Utilities Department at 1-800-665-1636. After regular business hours, press '5' to connect to the emergency line.
