

ADDENDUM No. 01

Cariboo Regional District: Request for Proposals: # 26-012:

Addendum number 01 is issued to the Cariboo Regional District Request for Proposal # 26-012 to provide the following responses to questions submitted for clarification: **All Responses identified in bold red text.**

CHANGE 1: Questions and Responses.

- 1 Looking over the documents, I have come across 2.2.3 referring to Valid Permit for sewage sludge disposal. I am not familiar with this permit as most dump locations just require us to phone ahead prior to our arrival. Can you point me in the right direction to obtain on of these permits?

There isn't any sewage sludge disposal it's all just municipal sewage disposal. That can be done at the City of Quesnel and the CRD's dump stations if approved by either or municipal entity. Please disregard 2.2.3 and Appendix D Section B.

2. **Appendix D Item B - Contractor Supply states:**

The Contractor shall supply all labour, a vactor truck(s), water, equipment, and tools, materials and supplies required to carry out the works and **must have** a current and valid a BC provincial government permit to dispose sewage sludge at a government approved sewage sludge disposal facility.

Reference to a vactor truck(s) and must have a current and valid a BC provincial government permit to dispose sewage sludge at a government approved sewage sludge disposal facility removed. New Appendix D Item B - Contractor Supply to read: The Contractor shall supply all labour, water, equipment, and tools, materials and supplies required to carry out the works.

3. Do you have maps available?

Maps will be provided to the successful proponent.

-END of Questions / Responses

All other terms and conditions as specified in the Request for Proposal shall remain the same.

Issued on Behalf of the Cariboo Regional District:

Larry Loveng

Manager of Procurement
