PLANNING COMMENTS

Background:

It is proposed to rezone a 0.234 ha. (0.58 ac.) portion of Crown land in order to resolve a trespass on Crown Land. The subject Crown land is zoned Resource/ Agricultural (RA 1) in the South Cariboo Area Zoning Bylaw No. 3501, 1999 and is outside of an Official Community Plan Area as seen in Appendix B.

The applicant (the owner of the adjacent parcel) has requested the subject Crown land be rezoned from Resource/ Agricultural (RA 1) to Rural 1 (RR 1). The intent is for the 0.234 ha. (0.58 ac.) portion of Crown land to be consolidated with the 16.19 ha. (40 ac.) parcel owned by the

applicant. The encroachment was discovered by the landowner and the landowner has approval from Crown Land Authorizations to purchase the subject 0.234 ha. (0.58 ac.) Crown land.

A Crown Grant Offer as well as correspondence from Crown Land Authorizations has been provided by the applicant.

Location & Surroundings:

The subject Crown land is located adjacent to 3045 Maze Forbes Forestry Service Road, 6 km north of Lac la Hache as seen in Appendix B. The subject portion of Crown land is mostly cleared of trees with some gravel and grass. The dwelling 37.16 sq. m. (400 sq. ft.) and outhouse are located on the lot line shared with the adjacent property. The septic system and shed 23.78 sq. m. (256 sq. ft.) are located on the subject Crown land.

CRD Regulations and Policies:

3501 - South Cariboo Area Zoning Bylaw, 1999

5.18.2 Zone Provisions

(a) Lot Area (minimum): 4 hectares (9.88 acres)

Rationale for Recommendations:

Planning staff are supportive of the proposed rezoning application. The proposal seeks to correct a historical encroachment on Crown land by a previous property owner through the process of rezoning and consolidating the subject Crown land. The proposal will also satisfy the required setback distances from the lot lines once the subject Crown land is consolidated. If the subject Crown land is rezoned it must be consolidated with the adjacent parcel.

The Ministry of Transportation and Transit (MOTT) has not provided a comment on this application.

The Electoral Area 'G' Advisory Planning Commission (APC) has not provided a response to this application.

The Ministry of Water, Land and Resource Stewardship (MWLRS) has responded that they are in support of the proposed rezoning.

The Ministry of Agriculture and Food (MAF) has responded stating that they have no comments or concerns with the proposed rezoning application.

The Interior Health Authority (IHA) has responded stating they have no objections to the proposal.

In summary, planning staff are supportive of the proposed rezoning application. As the proposed rezoning application will take place within 250 m of a high sensitivity waterbody, the applicant will be required to register a covenant in accordance with the Cariboo Regional District Shoreland Management Policy at the time of lot consolidation.

Recommendation:

That South Cariboo Area Zoning Amendment Bylaw No. 5569, 2026 be read a first and second time this May 1, 2026.

Describe the existing use of the subject property and all buildings: Recreational only. A summer cabin.

Describe the proposed use of the subject property and all buildings: Continuation of same, i.e., recreation only.

Describe the reasons in support for the application: See attached supporting document titled "Property Information".

In summary, development was done on the 0.234 ha with the understanding that it was part of our property.

Provide a general description of vegetation cover (i.e. treed, grassland, forage crop etc.): Mostly cleared: gravel and short grass, however, some trees remain around the septic field.

Provide general geographical information (i.e. existing lakes, streams, physical features etc.): Land is mostly flat and a beaver maintained lake that fluctuates in size is north of the 0.234 ha.

Description of the Situation

In July of 2007, we found the 40 acres (PID 003-917-568) listed and requested the real estate agent for a viewing of the property. When we arrived at the property, we stopped at the gate and the real estate agent pointed to the right, indicating that in that direction was the southern property line. We were told that a survey of the property boundary did not exist. This was confirmed years later when we inquired about having a survey performed.

A few years after we bought the property, the previous landowner visited us and told us they had received permission to add a gate in the fence that is now the entryway from the BC Hydro right of way. We do not know who that permission came from. They added the road and immediate clearing around the cabin that they built.

Based on our understanding of the property boundaries, we proceeded to build a workshop, drill a well, and install a septic field. The locations of these are shown on the map. For a time, we also had solar panels next to and on the house and a back-up generator. This recreational property is completely off the grid.

In 2021 we contacted a surveyor in Williams Lake who confirmed what the previous surveyor had told us. We decided to proceed with the survey as we wanted to build an extension to the existing cabin and build a fence along the boundary to keep out the cows that are pastured in the area during the summer and are destroying our infrastructure.

The survey was completed in June 2021 and this is when we learned that the property line was not where we had been told by the real estate agent, but actually ran through the existing cabin and outhouse that the previous owners had built. Based on this information, we applied to the government to purchase the Crown land where part of the existing cabin and improvement lay. The survey showing where the .234 ha is in relationship to the 40 acres already Zoned as Rural 1.
